

Credit Score Report for Card Number 201429549783908

Transaction Count: 50

Average amount in account before a transaction: 9520.8152

Average amount in account after a transaction: 8578.7184

Concise Explanation:

Based on 50 transactions with an average amount of \$8,578.72, this user likely has a history of high-value transactions, suggesting a potentially higher credit risk. The high transaction volume and average amount indicate significant credit utilization, possibly leading to a lower credit score prediction due to increased risk exposure for the lender.
